

QWCFP

Imagine that the entire information lifecycle [capture, processing, management, storage, preservation, and publication] is considered "managed" rather than a "data repository without management" or a simple file system.

THE PRODUCT

I am a module that works in a way connected or independent to the QW platform Control.

I am responsible for keeping in the same place digital content that can be shared with technical personnel or not.

These are my characteristics:

- » Allow creation, editing, storage, content management and publishing
- » Control access to content
- » Enforce a set of rules by groups specific, of the information life cycle
- » Ensure centralized workflow
- » Facilitate remote access
- » Allow easy collaboration between users
- » Be an integration and collaborative tool.

BENEFITS

- Grouping of information [taxonomy]
- Audit/Traceability
- Copy/Move/Delete [upon approval]
- Scalability
- Innovation
- Centralized monitoring
- Real-time notifications [real time]
- Predictability
- Cost reduction
- Enhanced security [against threats]
- Document retention time
- Visibility [OLAP tool]

Whether in development, operations or lines of business, QW CFP is the ultimate solution in content and document management.
